THE ORGANISATION

Established in 2001, Ummah Welfare Trust is a UK-based international relief and development charity. Inspired by the Islamic teachings of empathy, generosity and selflessness, the trust aims to alleviate poverty and suffering across the world, and also ensuring that the rights of those who are neglected and oppressed are fulfilled by providing sustainable development solutions relating to shelter, education, health, and spiritual wellbeing.

Knowing that we are all ultimately accountable to the Almighty, the charity strives to maintain transparency and accountability, and as such the charity also has a full and transparent audit trail from the donor to the beneficiary.

THE ROLE

We are seeking an experienced Product Owner to support the implementation of a Salesforce-based custom application for Programme and Aid Management within an international NGO environment.

The Product Owner will act as the bridge between programme teams, operational stakeholders, and technical delivery partners to ensure the solution meets organisational needs, improves operational efficiency, and supports effective programme delivery across multiple countries.

KEY RESPONSIBILITIES

- Lead product ownership for the Salesforce Programme/Aid Management application.
- Gather, document, and prioritise business requirements from programme, grants, MEAL, finance, and operations teams.
- Translate business needs into clear user stories and functional requirements for technical teams.
- Maintain and prioritise the product backlog in collaboration with stakeholders.
- Support the design and rollout of workflows relating to:
 - Programme management
 - Beneficiary tracking
 - Grant and donor reporting
 - Case and activity management
 - Monitoring, evaluation, accountability, and learning (MEAL)
- Facilitate workshops, sprint planning sessions, user testing, and stakeholder reviews.
- Work closely with Salesforce developers, administrators, implementation partners, and business users.
- Ensure alignment with organisational processes, data governance, safeguarding, and compliance requirements.
- Coordinate user acceptance testing (UAT) and support change management activities.
- Contribute to training materials, documentation, and adoption planning.
- Monitor delivery progress, risks, and dependencies throughout implementation.
